

Hi, my name is Eulices and I'm from Costa Rica. My question is what ____ (is / are) some tips to learning ____ (the / a) language?

I have three tips ____ (for / of) learning a language. The first one is that you ____ (need / needs) to like this language. There has to be a ____ (reason / reasons) for you to learn so that you have the ____ (motivate / motivation) to continue and to do so. For example, if it ____ (allow / allows) you to meet new people or it ____ (allow / allows) you to get a job, or if you like the way it sounds or it's ____ (writing / written), that will give you motivation when it gets ____ (hard / hear), and generally, it always gets hard because ____ (any / all) languages have some kind of ____ (barrier / barriers).

The second one is that you need to ____ (surround / surrounded) yourself with material that is in ____ (this / there) language. For example, movies or music, or talking to people ____ (who / what) are native to this language, so that you are in constant ____ (contact / contract) with this language.

And the third one is that you need to ____ (practical / practice), because even if you have ____ (completely / completed) learned a language, which is not something that ____ (generally / general) can happen because there is always ____ (something / somewhere) new to learn, but even when you have a high ____ (level / lever) of it, if you don't practice, you will lose it and you will not even ____ (notices / notice) when you're losing it. So ____ (those / this) are my three tips to ____ (learning / learned) a language.
